Dear University of Lethbridge Faculty

I am writing you to provide a reference for Luka Fishter. He was my Mathematics Instructor at Naval Fleet School(Pacific) in 2022. He had informed myself and my fellow course mates that we were his first class to teach. Seeing his instructional capabilities had he not told us that I would have presumed that he had been instructing for several years. He catered to each of our individual needs and educational requirements. He communicated to us in a way that conveyed complex concepts and algorithms in a simple and easy to understand manner that enabled all of us to succeed.

As a member of his first class taught, I believe that his capability to quickly and efficiently discern his pupils strengths and weaknesses and build upon both will be greatly appreciated in the educational instruction world. With his acceptance, he will bring a new spark to the community of teachers and students wherever he goes.

If you have any questions please don't hesitate to contact me.

Sincerely,

Kieran Gardiner
Marine Mechanical Technician
